Professional Profile

Director, Algo eRisk Quant Trader — European Rates & SSA Specialist

Director and Quant Trader with a proven track record originating, managing, and monetising high-Sharpe relative-value (RV), automated hedging, and electronic risk (eRisk) strategies across the €10trn supranational, agency, and European government bond (EGB) universe. Fully self-contained from first-principles signal generation to live execution and real-time risk management across tier-1 investment banks (HSBC, Morgan Stanley, BofA, BNP Paribas).

Core strengths that translate to immediate P&L in fixed income & electronic risk trading

- Rapid conception, validation, and live execution of cross-country, curve, cash-futures basis, and issuer-level RV trades.
- Deep SSA and EGB franchise expertise — extracting edge from complex multi-dealer flows with dynamic hedging algorithms.
- Full-stack quant workflow — 10+ years architecting production Python systems (pandas, NumPy, SciPy, asyncio) on multi-TB tick/order-book data.
- Pioneer in integrating agentic AI workflows into front-office trading — accelerating signal prototyping, backtesting, and automation tool deployment by 5–10×.
- Rigorous first-principles approach — Ph.D. Space Physics & 1st Class MPhys, Imperial College London.

Professional Experience

HSBC **Oct 2026 – Present**

Director — Algo eRisk Quant Trader **Oct 2026 – Present**

- Leading algorithmic trading and electronic risk management across G10 rates, relative value, dynamic hedging, and automated price discovery.
- Driving eRisk optimization and liquidity capture strategies across primary and secondary electronic fixed income venues.

Morgan Stanley **2014 – Jul 2026**

Senior EGB & SSA Electronic Rates Quant / Desk Strategist **2018 – Jul 2026**

- Owned cross-country, curve, ASW spread, and cash-futures basis RV models across EGB and SSA markets.
- Designed automated flow-hedging and inventory-recycling frameworks delivering consistent multi-million euro annual contribution.
- Primary quant interface between senior voice trading desks and electronic market-making platforms.
- Built high-throughput data analysis pipelines in Python + kdb+/q processing multi-terabyte order-book datasets.

Head Desk Quant — EGB & Gilts **2014 – 2018**

- Led quantitative support and analytics for European Government Bonds and UK Gilts trading desks.
- Delivered real-time RV signals, client P&L attribution, and curve/breakeven tools still operating in production.

Bank of America Merrill Lynch **2010 – 2014**

EGB Head Desk Quant

- Built bespoke pricing, real-time risk, and interactive visualization tools for the European government bond desk (Matlab, Python, Quartz).

BNP Paribas **1998 – 2010**

USD Supranational, Agency & Covered Bond Market Maker (London)

- Market-made spread products through the Global Financial Crisis and Eurozone sovereign debt crisis.

- Earlier roles: Exotic rates options pricing/hedging strategist and desk quant.

Education

Ph.D. Space Physics	**1994 – 1998**	Imperial College London
1st Class MPhys Physics	**1991 – 1994**	Imperial College London

Technical Skills

Python (pandas, NumPy, SciPy, asyncio, agentic AI/multi-agent frameworks), kdb+/q, Excel/VBA, Matlab, Bloomberg, Tradeweb, MTS, Eurex, Git
